

# Plasma Cutting Services

Exacting / Cost Effective / On Time

## You Can Turn Precision Cutting Into PROFITS

The key to increasing profits is providing a quality product that sets you apart from your competition at a reasonable price. Wear-Con's precision plasma cutting services can be part of that key. With local service and standards beyond compare, we deliver results.

Our high definition plasma cutting and beveling services can make a variety of cuts at a variety angles on material of various thicknesses. We offer competitive pricing by performing our plasma cutting and beveling simultaneously in order to reduce the need for secondary operations. The (2) CNC beveling heads provide a finished product with a weld-ready surface.

Our production facilities are structured to operate 24 hours a day to meet crucial deadlines. Within our plant, we have a wide variety of equipment to handle the very simple to the most complex production, from the smallest to the largest project. Wear-Con uses only certified welders in our operations.

Supporting these facilities is a staff of experienced fabricators and engineers. So, you can count on us to provide you with solutions to seemingly unsolvable problems. Call us today and see how to turn our precision cutting into your profits.
