To whom it may concern:

We recently had Wear Concepts help us with a floor leak. We had a difficult problem with a large moving slab with about an inch and a quarter gap around it. We had water and product running through the seam. Cory Booz gave us a reasonable bid to remove the old seal and install their sealant product. His crew came in and performed the work in a professional manner, observing all of our GMP rules. When they left the area was in a clean and otherwise orderly condition. Cory and crew got the job done in less time than they expected. The bid was adjusted accordingly.

I recommend this group with no hesitation. If I can be of further assistance, please do not hesitate to give me a call.

Update! I had an emergency situation come up today, I called Cory and within 1 hour he was on scene with the product I needed and to assist. This kind of support is huge to us. Again, I recommend this company with absolutely no reservation.
