To: Dennis Todd, Wear-Concepts, Inc.

I wanted to write to let you know the wear sleeve designed for the tertiary air duct thermocouple well on our #5 Kiln system has worked extremely well for our application. We were having to replace the well and thermocouple on a weekly basis and sooner in some instances on our tertiary air duct. This problem was mentioned in conversation with Cory Booz, Wear-Concept's representative for Monarch Cement, and with his and Wear-Concepts efforts designed a solution for this problem. We now get three to five months without having to change the thermocouple. We appreciate the effort by your employees in helping us solve this problem.

Sincerely:

Kenny G. Miller
Maintenance Supervisor
The Monarch Cement Company
