Product: **WC90 Weldable Style Ceramic**
Industry: Coal Fired Power Plants, Cement Plants and Lime Kilns
Application: ABB Raymond Coal Mill Exhauster Housings

Are you tired of replacing heavy cast liners from the OEM on a regular basis in the Coal Mill Exhausters? If so, you might want to consider the use of Wear-con WC90 Ceramic in your exhausters.

Wear-Con installed a new lining of WC90 Weldable Ceramic along with a pre-engineered ceramic bullnose in three (3) No 593 Coal Mill Exhausters back in January 1997 for a coal fired plant in Nebraska. The WC90 Ceramic lining has provided six (6) years of uninterrupted service life. Previously the customer would have performed repairs every 12 to 18 months.

If you are interested in having your Coal Mill Exhauster Lining upgraded to WC90 Ceramics, please fax your name, company name and the size of your exhauster to (816) 587-2055 or simply give us a call at 816 587-1923. We will work with you on pricing and set up a time for the upgrade to be done on your equipment.

Exhauster Fan and Cover with WC90 Ceramic Lining
